## ABOUT ME

Software Engineering graduate from the University of Information Technology (UIT) with an Excellent GPA (3.65/4.0) and strong English communication skills (TOEIC 915). Experienced in building enterprise web applications using React, Next.js, NestJS, and TypeScript. Passionate about designing scalable software, solving business problems, and quickly learning new technologies. Eager to contribute to international projects while continuously growing as a Software Engineer.

## EDUCATION

University of Information Technology (UIT) | 2022-2026

### Bachelor of Engineering in Software Engineering

Graduated in 2026 | GPA: **3.65/4.0 (9.13/10)**

## CERTIFICATES

TOEIC Listening & Reading: **915/990**

TOEIC Speaking & Writing: **320/400**

## WORK EXPERIENCE

HONEYNET JSC | Jan 2026 - June 2026

### Military Service Management Platform

- Designed and integrated RESTful APIs to support data synchronization, reporting, and administrative operations.
- Optimized administrative workflows by building centralized dashboards for military record management.
- Contributed to backend development by implementing RESTful APIs using NestJS and TypeScript for User, Role, Configuration and Service Period modules.
- Worked across both frontend and backend to deliver end-to-end features in an Agile team.

### UHS Core App (Scalable Storage Management Platform)

- Developed scalable web modules for file organization and lifecycle management using Next.js, React, TypeScript, and Tailwind CSS.
- Integrated Keycloak authentication and authorization to support secure role-based access control.
- Collaborated closely with backend engineers to define API contracts, troubleshoot integration issues, and deliver new features.

## SKILLS

- Programming Languages:** JavaScript (ES6+), TypeScript
- Frontend:** Next.js, React, HTML5, CSS3, Tailwind CSS
- Backend:** NestJS, RESTful APIs, JWT Authentication
- State Management & Data Fetching:** TanStack Query (React Query), Zustand
- Database:** PostgreSQL, MySQL
- Developer Tools:** Git, GitHub, GitLab, Postman, Bruno
- Development Practices:** Object-Oriented Programming, RESTful API Design, Agile/Scrum
